**Position:** Histology Technician  
**Location:** Ithaca, NY  
**Date Posted:** 15 Mar 2021  
**Start Date:** March 2021  
**Job Type:** Contract  
**Compensation:** Depends on experience  
**Contact:** Greg Mouchka | [greg@ifyber.com](mailto:greg@ifyber.com)

iFyber is seeking a histology technician to assist with R&D projects at the interface between chemistry, biology, and material science. iFyber serves clients in the medical device, diagnostics, and antimicrobial industries. The person in this position will support a research project requiring sectioning, staining and mounting specimens. This is not a diagnostic pathology lab, rather an ongoing R&D development program. This is a contract position.

#### **Duties and Responsibilities**

- Section paraffinized samples with an automated microtome
- Appropriately use immunochemistry stains according to documented protocol
- Follow established protocols and work with senior staff to adapt or design new protocols
- Label samples and document results
- Assume responsibility for following safety protocols and keeping work area clean and neat

#### **Requirements**

- Demonstrated human or animal tissue histology capability, 3-5 years experience
- ASCP Histotech or Histotechnologist certificate, preferred but not necessary
- Meticulous attention to detail and documentation skills

#### **About iFyber:**

iFyber is a contract research and development organization located in Ithaca, New York. We offer unique expertise at the interface of chemistry, biotechnology and materials science. Our complementary skill sets help our clients efficiently advance innovation and address untapped markets. We thrive at the early stages of product and technology development, with a technical team that provides creative, yet practical, inputs to applied problems using rigorous scientific principles, and an experienced business development team to position outcomes for market introduction under appropriate timelines.
